

Technical Data Sheet

Sunpol 3156

Long Oil Alkyd

3156 is a soya based long oil alkyd at 100% solid. This resin provides excellent drying and non-yellowing properties. 3156 can be used in exterior penetrating finishes and interior and exterior architectural enamels. It may also be used in latex modifiers.

Benefits:

- ✓ Excellent Dry
- ✓ Non-Yellowing
- ✓ Flexibility
- ✓ VOC free

Applications:

- Exterior Penetrating Finishes
- Industrial & Architectural Coatings
- Latex Modifier
- Wood Stains

Typical Properties:

Viscosity (Gardner)	Z1-Z3
Percent Solids (Weight)	100%
Color	10 Max
Acid Value	10 Max
Density (lbs/gal)	8.45 +/- 0.1
Appearance	Clear

Additional Information:

Store in a dry location avoiding temperatures above 100 °F. Avoid contact with air/oxygen to ensure shelf life of at least one year. For all questions pertaining to this product (safety, quality, technical advice, etc.) please email info@sunpol.com
