

Technical Data Sheet

Sunpol 4075

Long Oil Alkyd

Sunpol 4075 is formulated for trade applications and general maintenance coatings. Offering a wide range of formulation flexibility with excellent flow and leveling. Well balanced properties make this resin a great choice for application requiring durable products.

Benefits:

- ✓ Flow and Leveling
- ✓ Durability
- ✓ Yellowing Resistance

Applications:

- Interior and exterior architectural enamels
- Penetrating finishes

Typical Properties:

Viscosity (Gardner)	Z2-Z4
Percent Solids (Weight)	69%-70%
Reduced Viscosity in DMC	D-G @ 50% NVM
Color	7 Max
Acid Value	10 Max
Density (lbs/gal)	8.0 +/- 0.1
Appearance	Clear
Solvent Type	Rule 66 Mineral Spirits

Additional Information:

Store in a dry location avoiding temperatures above 100 °F. Avoid contact with air/oxygen to ensure shelf life of at least one year. For all questions pertaining to this product (safety, quality, technical advice, etc.) please email info@sunpol.com
