

Technical Data Sheet

Sunpol 4081

Medium Oil Alkyd

4081 is a high viscosity medium oil that presents an optimal balance of hardness and flexibility. It dries quickly with good appearance and gloss making it ideal for finishing coatings that require durability.

Benefits:

- ✓ Fast Drying
- ✓ Good Flexibility with Hardness
- ✓ Chemical Resistance
- ✓ Color Retention
- ✓ Good Gloss

Applications:

- Architectural Enamels
- Industrial Coatings
- Finishing Coatings

Typical Properties:

Viscosity (Gardner)	Z1+-Z3+
Percent Solids (Weight)	49-51%
Color	5 Max
Acid Value	12 Max
Density (lbs/gal)	7.5 +/- 0.01
Reduced Viscosity at 45@ in VMP	K-O
Appearance	Clear

Additional Information:

Store in a dry location avoiding temperatures above 100 °F. Avoid contact with air/oxygen to ensure shelf life of at least one year. For all questions pertaining to this product (safety, quality, technical advice, etc.) please email info@sunpol.com
