

Technical Data Sheet

Sunpol 6975

Vinyl Toluene Modified Alkyd Resin

6975 is an alkyd copolymer modified with vinyl toluene supplied at 60% solids in VM&P Naphtha. With extremely fast dry and good adhesion, this resin is ideal for aerosol paints and stain blocking primers.

Benefits:

- ✓ Rapid dry
- ✓ High Gloss
- ✓ High durability
- ✓ Compatible with aerosol propellants
- ✓ Good adhesion

Applications:

- Marking Paints
- Aerosols
- Stain Blocking Primers

Typical Properties:

Viscosity (Gardner)	Z-Z2
Percent Solids (Weight)	59-61%
Reduced Viscosity (Gardner)	B to G @ 40% in VMP
Color	5 Max
Acid Value	10 Max
Density (lbs/gal)	7.45+/- 0.01
Appearance	Clear
Solvent Type	VM&P

Additional Information:

Store in a dry location avoiding temperatures above 100 °F. Avoid contact with air/oxygen to ensure shelf life of at least one year. For all questions pertaining to this product (safety, quality, technical advice, etc.) please email info@sunpol.com
